EXPERIENCE

BEKK Consulting, Oslo — *Consultant*

MAY 2013 - PRESENT

Software engineer, consultant and technology adviser.

At the Norwegian Postal Service: Full-stack development responsibilities with focus on front-end and improving the continuous delivery pipeline. Enabled daily delivery of high-quality software, up from monthly release cycles. Ported app portfolio from Java 6 to 8 and created new public-facing APIs, as well as tracking and reporting services. Developed and released a new version of their business-facing website Bring.no, which was received with great praise from its users.

At Gjensidige: Front-end development efforts with focus on improving their front-end builds and frameworks. Worked with the "fast-track" team, handling urgent business requirements and bug-fixes for their website Gjensidige.no.

Currently working remotely for the Norwegian Postal Service, creating their all-new consumer-facing website from scratch.

GET, Oslo — *Software Engineer*

JANUARY 2012 - MAY 2013

App engineer and frontend developer for Norway's largest TV and internet provider. Developed one of Norway's most popular Windows Phone apps. Also maintained and improved their portfolio of backend Java applications.

EDUCATION

Oslo and Akershus University College of Applied Sciences, Oslo — *BsC, Computer Engineering*

AUGUST 2009 - JUNE 2013

Received several honors for school projects, including a social awareness award, as well as the best bachelor's thesis of my year. Spent 12 months at San Francisco State University as an exchange student. Received a high GPA throughout my studies.

SKILLS

Versatile and experienced front-end engineer. For the back-end I prefer the Java ecosystem. I love solving problems.

CSS expert, JavaScript lover, React enthusiast, FLUX convert, UX fan, open source evangelist, NPM hipster.

Devops state of mind. Experience in agile deployments, cloud hosting, Puppet and Docker. My code - my responsibility.

SCRUM is good, Lean is better. Test driven developer. I believe in data-driven decisions.

Social and easy going, adventurous and laughs a lot. DJs every once in awhile.
